

Create a modern, elegant, responsive portfolio website for a Sri Lankan traditional dancing artist and web developer.

Project Title

සාම්ප්‍රදායික කලා උරුමය **Traditional Cultural Heritage — Dancing Portfolio**

Person / Brand

Name: SAHAN M DISSANAYAKE

Also known as: Shamod Firez

Role: Traditional Dancer & Web Developer

Technology

Build the website using:

- HTML5
- CSS3
- Vanilla JavaScript
- No backend required
- Responsive design for mobile, tablet, and desktop

Overall Design

Create a visually impressive website inspired by **Sri Lankan traditional culture and Kandyan dancing**.

The design should combine:

- Sri Lankan cultural heritage
- Traditional Kandyan dance aesthetics
- Modern portfolio design
- Elegant animations
- Dark, premium visual style
- Gold and warm earthy accent colors
- Traditional Sri Lankan patterns as subtle decorative elements

Avoid making the website look old-fashioned. It should feel like a **premium modern cultural portfolio**.

Website Sections

1. Loading Screen

Create a short animated loading screen with: සාම්ප්‍රදායික කලා උරුමය

Then smoothly transition into the main website.

2. Navigation Bar

Create a sticky navigation bar containing:

- Home
- About
- Dancing
- Gallery
- Achievements
- Web Development
- Contact

Add a mobile hamburger menu.

The navigation should become slightly transparent/blurred when scrolling.

3. Hero Section

Create a full-screen hero section.

Main Sinhala heading:

සාම්ප්‍රදායික කලා උරුමය

English subtitle:

Preserving Tradition. Performing Heritage. Creating the Future.

Display:

SAHAN M DISSANAYAKE

Shamod Firez

Role:

Traditional Dancer | Web Developer

Add two buttons:

Explore My Journey

View Portfolio

Use a large Sri Lankan traditional dancing image as the hero background.

Add subtle animated particles or floating traditional pattern elements.

4. About Me

Create an attractive About section introducing Sahan.

Heading:

About Me

Text should explain that Sahan M Dissanayake, also known as Shamod Firez, is passionate about Sri Lankan traditional dancing and modern web development.

Emphasize:

- Sri Lankan cultural heritage
- Traditional dance
- Creativity
- Discipline
- Technology
- Web development
- Preserving culture through modern digital experiences

Add an elegant profile image/card.

5. Dancing Section

Heading:

My Dancing Journey

Create cards for traditional Sri Lankan dance styles.

Include examples such as:

- Kandyan Dancing
- Low Country Dancing
- Sabaragamuwa Dancing
- Traditional Drumming
- Cultural Performances

Each card should contain:

- Image
- Dance style
- Short description
- Animated hover effect

Use cultural-inspired borders and patterns.

6. Gallery

Create a beautiful responsive image gallery showing traditional dancing.

Use a masonry-style or modern grid layout.

Include categories:

- Performances
- Traditional Costumes
- Cultural Events
- Training
- Behind the Scenes

Add JavaScript filtering buttons.

Clicking an image should open a modern fullscreen lightbox.

7. Achievements

Create an animated achievements/timeline section.

Example categories:

- Dance Performances
- Cultural Events
- Competitions
- Awards
- Certificates
- Special Performances

Use animated counters and timeline cards.

Do not invent specific awards or achievements. Use placeholder content that can easily be replaced with real achievements.

8. Web Developer Section

Create a separate section showing the modern technology side of Sahan.

Heading:

Beyond Tradition — I Build for the Web

Subtitle:

Traditional creativity meets modern technology.

Show skills using animated progress bars or cards:

- HTML5
- CSS3
- JavaScript
- Responsive Web Design

- UI/UX Design
- Front-End Development

Add a portfolio project grid with placeholder projects.

Each project card should contain:

- Project image
- Project name
- Description
- Technologies
- View Project button

9. Cultural Heritage Quote Section

Create a visually impressive full-width section with a traditional Sri Lankan background.

Display:

"Our heritage is not just our history — it is the story we continue to tell."

Use elegant Sinhala-inspired typography and decorative patterns.

10. Contact Section

Heading:

Let's Connect

Include a modern contact form:

- Name
- Email
- Subject
- Message
- Send Message button

Also show social/contact placeholders for:

- Facebook
- Instagram
- YouTube
- GitHub
- LinkedIn

Do not invent actual profile URLs. Use placeholders that can be replaced later.

11. Footer

Create a premium footer containing:

සාමප්‍රදායික කලා උරුමය

SAHAN M DISSANAYAKE | Shamod Firez

Text:

Traditional Dancer • Cultural Enthusiast • Web Developer

Add navigation links and social icons.

Copyright:

© 2026 Sahan M Dissanayake. All Rights Reserved.

Visual Style

Use a premium cultural color palette such as:

- Deep charcoal / black
- Dark brown
- Antique gold
- Warm beige
- Cream

Use gold mainly for highlights and borders.

Use subtle Sri Lankan traditional patterns in:

- Section backgrounds
- Cards
- Dividers
- Hero decorations

Do not overcrowd the page.

Typography

Use a combination of:

- Elegant serif font for major headings
- Modern sans-serif font for body text
- A suitable Unicode-supported Sinhala font for Sinhala headings

Make sure Sinhala characters render correctly.

Animations

Use smooth JavaScript/CSS animations including:

- Fade-in on scroll

- Slide-up sections
- Image hover zoom
- Navigation animation
- Animated counters
- Button hover effects
- Gallery lightbox
- Smooth scrolling
- Mobile menu animation
- Hero background movement/parallax

Animations should be elegant and not excessive.

Responsive Design

The website must work perfectly on:

- Mobile phones
- Tablets
- Laptops
- Desktop monitors

Use CSS media queries.

Make the navigation mobile-friendly.

Ensure images never overflow the screen.

Accessibility

Include:

- Semantic HTML
- Proper heading hierarchy
- Alt text for images
- Keyboard-friendly navigation
- Good color contrast
- Accessible buttons and form fields

Code Structure

Create these files:

index.html

style.css

script.js

Keep HTML, CSS, and JavaScript separated.

Write clean, organized, well-commented code.

Important Image Handling

Use placeholder image URLs or clearly marked placeholder image paths for now.

Do NOT claim that placeholder images are actual personal photographs.

Make it easy to replace every image later.

Final Goal

The final website should feel like a **premium personal cultural brand website** that tells the story of:

SAHAN M DISSANAYAKE / Shamod Firez

as both a **Sri Lankan traditional dancer** and a **modern web developer**.

The website should communicate:

Culture + Art + Discipline + Creativity + Technology

Make the final result visually impressive, professional, cinematic, fast, responsive, and suitable for a real portfolio.
